CLIMATES '19

2nd climate conclave on

YOUTH AND

CLIMATE ACTION

VENUE:

TERI School of Advanced Studies

Vasant Kunj

DATE: 11 Nov 2019

ABOUT THE EVENT

CLIMATES'19, the second edition of the youth driven climate change conclave is organised by the students of Climate Science and Policy programme at TERI SAS. Focussing on the role of youth in climate action, the conclave will provide the participants an opportunity to interact with experts from different sectors. The aim is to inform and encourage the youth to take an active part in building adaptive capacity and exploring innovative and climate friendly choices towards a more climate-just society.

ABOUT TERI SAS

The TERI School of Advanced Studies established in 1999, is a 'Deemed to be University' to build capacities around various themes of sustainable development. It follows an inter-disciplinary approach incorporating the most contemporary, research-based evidence into the curriculum. The Master's programme in Climate Science and Policy (CSP) was started in 2009, to train students and professionals in understanding the science, impacts and policy dimensions of climate change across regions, resources and societies.

**Take urgent action
to combat
climate change
and its impacts**

MESSAGE FROM VICE CHANCELLOR

"The world is waking up to the climate crisis and demanding action now. Climate crisis is that one global truth for which we need one planet united in action. The time to 'negotiate' emission reductions has long gone by, now is the time to act, the youth needs to act. The intention of the climate conclave is to encourage the youth to set leadership examples in climate actions."

- Dr. Manipadma Datta
