Supervisors:

Dr. Shaleen Singhal

PROFILE

Pratibha Bisht is a Project Scientist in the Mountain Division, Ministry of Environment, Forest & Climate Change, with over 8 years of experience in environmental research and policy. She excels in preparing State of Environment Reports (SoER), evaluating research proposals, and conducting ecological surveys and impact assessments. Skilled in biodiversity conservation and ecosystem analysis, she actively promotes environmental programs in the Indian Himalayan Region. She is dedicated to empowering marginalized tribal communities through her impactful work and research.

PhD RESERACH

Pratibha Bisht is a Ph.D. scholar at the Department of Sustainable Engineering, TERI School of Advanced Studies. Her expertise lies in socio-ecological research, biodiversity conservation, and traditional ecological knowledge. Focusing on high-biodiversity regions in Northeast India, particularly Arunachal Pradesh, her research explores sustainable practices and the intricate relationship between forest-fringe communities and their environment. With several publications in leading journals, she has contributed significantly to understanding biodiversity conservation and socio-cultural practices. Committed to creating a positive social impact, Pratibha is deeply passionate about improving the lives of rural and marginalized tribal communities through her work.
