<b>Course description</b>				
<p><b>Strategic Management</b> is defined as a set of managerial decisions and actions that determines the long-term performance of a corporation. It includes strategy formulation, implementation and evaluation and control. The study of strategic management therefore emphasizes the monitoring and evaluation of environmental opportunities and constraints in light of corporation's strengths and weaknesses.</p> <p><b>Sustainability</b> is also now considered as a strategic issue by most of the firms across the globe and the three pillars of sustainability i.e. <b>ecological, social as well as economic sustainability</b> are finding place in the strategic landscape. Stakeholders are also demanding that firms should become environmentally responsible at all levels-be it corporate, business and functional level. The pressure from environmental groups have forced the firms to think and incorporate sustainability into all their functions i.e. product. market, operations, supply chain, finance etc. The managers need to evaluate their strategies from environmental perspective and adopt <b>sustainability strategies</b> in order to meet regulatory as well as stakeholder expectations. Hence, the business management students need knowledge, skills and tools to tackle <b>environmental challenges</b> in strategic terms by paying equal attention to financial, environmental and social issues that may affect their business. Hence, it makes sense to see the strategy as sustainable business strategy which includes environmental agenda in the list of strategists/ managers.</p>				
<b>Course objectives</b>				
This course is a basic strategic management course covering all aspects of strategy i.e. environmental analysis, internal analysis, strategic advantage analysis, strategy formulation, implementation and control. The course has been designed keeping in view the increasing need for environmental sustainability into products , markets and functional strategies of companies as demanded by stakeholders and regulatory authorities and hence at each step, Due emphasis has been given on the sustainable aspect of strategy formulation and implementation.				
<b>Course content</b>

	<b>Total</b>	<b>42</b>	<b>0</b>	<b>0</b>
<b>Evaluation criteria</b>				
<ul style="list-style-type: none"> <li>• Case Presentations (3) (Evaluation through presentation) 15%</li> <li>• Project/ Assignments (Evaluation through presentation) 15%</li> <li>• Minor Exam (s) (Closed Book Objective Type) 25%</li> <li>• End-term Exam (Open Book Case based) 45%</li> </ul>				
<b>Learning outcomes</b>				
<ul style="list-style-type: none"> <li>• To familiarize the students with factors affecting the firm and industry in long run and also with the tools and techniques of external as well as internal environmental analysis</li> <li>• To develop their analytical as well as decision-making skills to formulate and evaluate strategy under a given set of environmental factors</li> <li>• To develop a practical understanding of strategy formulation and implementation process</li> <li>• To develop an understanding of impact of regulators and stakeholders on business strategy and introduce the concept of sustainable business strategy</li> </ul>				
<b>Pedagogical approach</b>				
The course will have a mix of theory and applied coursework with more practical approach.				

The teaching shall be done mainly through lectures/ case discussions/case presentations/exercises etc. The entire course has been divided into **seven modules**. There will be **42 sessions** (One hour each) as per the course outline. The students are also expected to work out cases as well as assignments given at the end of each module which will help them develop their analytical as well as conceptual skills. There will be **three cases and a project**.

Both case study presentations as well as exercises are group assignments. Students are expected to work in the group of 4-5 for working out case solutions. The alternative solutions from all the groups will then be discussed in class. A list of reading materials shall be provided to each student. Students are also expected to come prepared before every class. The topics are largely based on the book on **Strategic Management by Fred R. David**
