Course ti	tle: Project Work Report								
Course code: WSW 106No. of credits: 6L-T-P: 0-0-168Learning hours: 200*									
Pre-requisite course code and title (if any): NA									
Department: Coca-Cola Department of Regional Water Studies									
	oordinator: Project/ Placement Course Instructor: Assigned superational superationa superational superational superational superational sup	rvisor(s)						
coordinator Contact details: email of assigned supervisors									
Course type: Core Course offered in: Semester 3 Course description Course offered in: Semester 3									
	The course offers a research driven learning approach, guided by realistic and challenging problems in water								
	sector. The course includes 6-8 weeks of in-house research or industry training on any water-relevant problem								
	upervised self-learning approach. Based on need of contemporary areas of wate								
	ter management, wetlands, wastewater and sewage treatment, innovations in agric								
	ciency, water audit & management, watershed practices and policy, guidelines								
	shall work on specific thematic areas, analyze data using basic statistics, ass								
	tent in existing solutions or similar tasks assigned by the supervisor. The studer								
their classroom learnings and specialization, test hypothesis through literature review, experiment or field survey, analyze and report the results/findings. It would prepare students to take up water resource management									
projects in future with a clear understanding of linkage of water to sustainable development.									
Course objective									
• To w	ork on ideas that are aligned with the government programmes on water managen	ent.							
	mporary areas of water sector including groundwater, water pollution, wastewater								
	nent, innovations in agriculture, water reuse, water efficiency, water audit & man	agemei	nt,						
	shed practices and policy, guidelines & regulations								
	part skills and training relevant to the specific fields as mentioned above.	toola							
• To er	able the students to take up independent research work in future, applying variou	stoois							
Course c	ontents			-					
Module	Торіс	L	Т	Р					
	• Broad problem identification on thematic area in consultation with the	0	0	20					
	internal supervisor/host organization								
1	• Define overall aims and objective and relevant research questions and								
	research objectives to be addressed								
		0	0	20					
	• Define methodology to be followed and identify materials/tools to be	0	0	20					
	used for achieving each objective								
2									
	• Systematic review of literature, internal or external reports etc. relevant on the specific problem and create benchmark								
	relevant on the spectric problem and create benchmark								
		-	-						
	• Identifying parameters, variables to carry out situation analysis or	0	0						
				128					
	scenario analysis depending on objectives			128					
	• Data collection/ field survey/experimental or other relevant work			128					
3				128					
3	• Data collection/ field survey/experimental or other relevant work			128					
3	• Data collection/ field survey/experimental or other relevant work depending on the objectives			128					
3	 Data collection/ field survey/experimental or other relevant work depending on the objectives Analysis and interpretation of the findings/results/data 			128					
3	 Data collection/ field survey/experimental or other relevant work depending on the objectives Analysis and interpretation of the findings/results/data Developing overall conclusion based on inferences and findings and 	0	0	128 168					
* The rem	 Data collection/ field survey/experimental or other relevant work depending on the objectives Analysis and interpretation of the findings/results/data Developing overall conclusion based on inferences and findings and enlisting the limitations of the work. 	*							

Evaluation criteria

- Response/feedback from the host organization/supervisor (20%)
- Minor project report (40%)
- Presentation and Viva (30%)
- Meeting timeline (10%) (Consisting of: joining report (2%), progress reports (2% each), feedback form (2%), and final thesis (2%).
- If plagiarism is detected using plagiarism checking software (e.g. Turnitin), it will be referred to the Minor Project Committee (comprising of supervisors and faculty members), which would take a decision and penalty to be imposed/disciplinary action to be taken. The guidelines for the Minor Project Committee are as follows:

Levels of Plagiarism	Percentage of similarity	Maximum percentage marks to be deducted from dissertation/thesis
Level 3	> 60%	Student's registration to the program stands cancelled
Level 2	$>40\% \le 60\%$	Student repeats the course next year
Level 1	> 10% ≤ 40%	The student is required to resubmit the report within a week
Level 0	≤ 10%	0%

• The students scoring less than or equal to 50% (or \leq 50%) overall marks in the evaluation would be considered to have failed in this course. Grading of the Minor Project will be absolute in nature and would be done as per the following criteria:

>90	A+
>80≤90	А
>70≤80	B+
>60≤70	В
>50≤60	C+
>45≤50	С
>40≤45	D
<i>≤</i> 40	F

Learning outcomes

- Student develops an understanding of real time problems/challenges in water resources governance and management projects and their alignment with the government programmes.
- Student learns to apply research methods and different statistical tools in real-time research projects.
- Student learns and applies relevant scientific methods and techniques (statistical, numerical and/or geospatial) in problem-solving.
- Student is trained to effectively communicate and demonstrate the learning through structured thesis/dissertation and oral presentation.

Pedagogical approach

Self-learning; discussion with the supervisors; interaction with experts; field work; laboratory work, etc.

Materials

Peer-reviewed journal articles

Reputed conference proceedings

Reports related to the specific project

Learning materials provided by the host organization

Additional information (if any)

A detailed guideline along with important dates and format will be notified by the department, in advance, with other relevant details.

If there is any change in evaluation criteria/policy, it will be updated in the guideline every year.

Dissertation submission and schedule of presentation will be coordinated by Project/Programme coordinators.

Student responsibilities

Attendance; Discipline; Research Ethics etc.

Course Reviewer: MPEC
