

**Name:** Swetannita Chattopadhyay

**Research Group & Mentor:** Plant developmental Biology group, Dr. Anandita Singh

**Research Work/Project(s):**

PhD Research title: Role of MIR160 and ARFs in establishment of root architecture in Brassica species under Nitrogen limiting conditions.

**Fellowship Holder/Designation:** SAVITRIBAI JYOTIRAO SINGLE GIRL Child

**Additional Information:**

**Research Publication:** Differential expression pattern of Brassica juncea MIR160 paralogs and homeologs and in-silico analysis of Brassicaceae promoters uncovers evolutionary distinctness of MIR160a
