Course ty									
Any or eve a system to Therefore manager .									
Production and Operations Management (POM) focuses on carefully managing the processes to produce and distribute products and services." Conventionally speaking Major, overall activities under POM, include product creation, development, production and distribution. Major functions of POM include Managing purchases, Inventory control, Quality control, Storage, Logistics and Evaluations. Focus will be efficiency and effectiveness of the processes.									
Keeping in view profile of the participants in this batch, this course will chart upon a different approach, specially customized for this particular batch of students. Production and Operation Management is a subject relevant to all levels of the hierarchy in an organization, but in this course, in addition to covering usual topics like routine functions of POM which are relevant mainly for the operator level staff/officials; a major amount of effort and time will be spent on high level functions and sub-functions of POM relevant to creating or gearing up the Organizational set-up to the Global standards.									
Course objectives: One of the most critical areas for success in any business enterprise is how Production and Operations are managed. In the 'Productions and Operations Management' course an attempt will be made to integrate the courses studied by the students like statistics, economics, finance, organizational behaviour and strategy into a consolidated production and operation related decisions									
Course co	ntents					-			
Module	Торіс				L	T	Р		
1	Modul 1: Generation of Four key de Review of existing Organisa		Production	n and Operations'	1		0		
	 Best Practices of Indian and Re-designing the set-up to g 	global standards			1				
<u> </u>	Support Systems & Policies	necessary for su	ch an Inte	rnational set-up.	1				

>	Change Implementation path	1	
	ule 2: Defining an optimal model for POM Organisational set-up of the entity wing a five step approach		0
	 bench marks and industry best practices. Understanding Business Drivers: To develop a deeper understanding of the specific business drivers for the entity, , a qualitative analysis of the Important core and non-core operations using a new diagnostic tool "Four Stage Charts" Defining & Selecting Options: With regards to Processes, Organisational set-up and Resources: depending on the vision, business needs 	1 1 1 1	
	 ule 3: Developing 'PMO' Organisational Options: Based on diagnostically /sed characteristics and inputs from the existing set-up: Vision Strategic Direction and Performance Objectives (As determined in topic II (1) above) Design Principles (Emerging from managements perspectives for where the POM set-up is and where it should be) Best Practices (Determined above II(2) and shortlisted on the criteria of SWOT for the respective organisation. Building a future operating mode for the entity will need to sustain strengths and remove weaknesses Exiting Portfolio Shape and Direction: To be developed on a specially designed new Pyramidal model. Portfolio Needs, Activity Plans, Workload and commitments: To be synthesised from the business plans of the organisation (5yea plans/10year plans or strategic intents), by understanding futur Resource requirements, supported by an activity-driven model. Current Process Quality and Aspired Process Needs: As determined for various Core Functions and Support functions of POM from the Four Stage charts. 	1 1 9 7 9 7 9 7	

Module 4: Core functions and support-functions to be discussed in details: > Core Operation 1 : Production Operations Defining operating philosophy Planning production volumes and capacities	4	2	
 Analysing Operating facilities Core Operation 2: Maintenance Developing maintenance planning and strategy 	4	2	
 Executing maintenance activities Monitoring maintenance performance Support Operation 1: Contracts & Procurement Defining outsourcing philosophy 	3	1	
Developing sourcing strategy Selecting suppliers Managing suppliers Reviewing supplier performance Understanding total costs of procurement > Support Operation 2: Supply Chain Management	2	1	
 Managing supply chain Managing orders Managing inventory Support Operation 3: Logistics Managing warehouse Managing transport 	2	1	
Module 5: Case Studies Strategic Considerations in Internationalization Choice of Markets Entry Options : Rapid / Beachhead	2		0
Challenges Managing Global Competitiveness: Identifying Bottlenecks in POM 	2		
Total	35	7	0
Evaluation criteria: PARAMETER CREDIT			
Class Participation 15%			
 Individual assignments on mapping and redesigning different 30% organizations on specific new models introduced in the class 			
 and/or pre-announced quizzes/class tests. Presentation on any one pre-approved core or support 25% function of POM 			
 End-semester examination 30% 			

Learning outcomes:

After completing the course the participants shall develop an understanding on how to create a production entity with focus on -

- Production Base
- Financial (Cost) Performance
- Technical and Operational capabilities
- Human Capabilities

Pedagogical approach:

Discussions on the aforementioned topics, with a **continuous case study** in the form of mapping across the new **models** of Strategy, Pyramidal Model of Product and Activity spread and Four Stage Analytical model of different core and support POM functions. As the course will proceed, participants will be expected to map their own organizations along with and discuss the same in subsequent sessions leading to the final presentation. Participants in groups (to be formed in the first session) will also select and get approved any one **core or support POM function** and develop a presentation based on the teachings of the prescribed text book and including examples from his/her own industry/organization w.e.f. second week of the course.

Materials:

Suggested readings : 1) B Malakooti (2014), 'Operation and Production System with Multiple Objectives', Wiley 2) S N Chary (2013) . 'Production and Operation Management', 5th Edition, Tata Mac Graw Hill

Additional information (if any):NA

Student responsibilities: Attendance, feedback, discipline: as per university rules.

Course reviewers: 1) Dr. N M Ahuja, ONGC, 2) Mrs. Pomila Garga, ONGC Videsh Limited (OVL)
