

<b>Course title:</b> Photogrammetry				
<b>Course code:</b> NRG 170		<b>No. of credits:</b> 3	<b>L-T-P:</b> 26-2-28	<b>Learning hours:</b> 42
<b>Pre-requisite course code and title (if any):</b> NRG 178 Principles of remote sensing, NRG 176 Principles of GIS and GPS				
<b>Department:</b> Natural Resources				
<b>Course coordinator(s):</b> Dr Anu Rani Sharma			<b>Course instructor(s):</b> Dr Anu Rani Sharma	
<b>Contact details:</b> anu.sharma@terisas.ac.in				
<b>Course type:</b> Core			<b>Course offered in:</b> Semester 2	
<b>Course Description</b> This course introduces photogrammetry as a data acquisition tool and provides a general overview of its theory and working principles. This course covers the factors that influence the formation of the photographs, and the process of reconstructing the three-dimensional model for the real world. Students will gain the ability to extract data from aerial photography.				
<b>Course objectives</b> 1. To develop understanding about basic concepts of image geometry and measurement of aerial photograph. 2. To get acquainted with image interpretation and information extraction				
<b>Course content</b>				
<b>Module</b>	<b>Topic</b>	<b>L</b>	<b>T</b>	<b>P</b>
1	<b>Introduction to Photogrammetry</b> <ul style="list-style-type: none"> <li>• History of Aerial Photographs</li> <li>• Fundamentals of Aerial photographs</li> <li>• Basic concepts of Perspective projection and Orthographic projection</li> </ul>	2		
2	<b>Aerial cameras and Photographs</b> (Types, acquisition, scanning)	2		
3	<b>Photogrammetric project planning</b> <ul style="list-style-type: none"> <li>• Planning Aerial Photography</li> <li>• Elements of aerial photograph</li> </ul>	4	2	
4	<b>Stereoscopy</b> <ul style="list-style-type: none"> <li>• Stereoscopic photographs</li> <li>• Parallax</li> </ul>	4		
5	<b>Geometry of Aerial Photograph</b> <ul style="list-style-type: none"> <li>• Basic of Optics: Reflection, refraction and lens distortion</li> <li>• Photographic scale; Object height and Length</li> </ul>	2 2		
6	<b>Introduction to Ortho-photos and DEM/contour extraction</b> <ul style="list-style-type: none"> <li>• Photo mosaic and Ortho photo</li> <li>• Photograph co-ordinate and ground coordinate of Vertical photograph</li> <li>• Digital Photogrammetry: Block adjustment, Ortho-rectification</li> <li>• Digital Terrain Model and Terrain editing,</li> <li>• Satellite Photogrammetry</li> </ul>	2 2 2		
7	Aerial Photo Interpretation techniques and tools	2		
8	Applications and limitation of Aerial Photography	2		

	<b>PRACTICALS</b>			
1	Interpreting an Aerial photograph			2
2	Stereovision exercise and 3D model perception in stereoscope			4
3	Photo and Image coordinate calculation for vertical photographs			2
4	Parallax bar operation and height calculation			4
5	Introduction to Leica Photogrammetry suite (LPS)			2
6	Orthorectification of aerial photographs / satellite datasets			8
7	DEM generation using ortho images			4
8	Introduction to Stereoanalyst			2
	<b>Total</b>			<b>28</b>
<b>Evaluation criteria</b>				
<ul style="list-style-type: none"> <li>▪ Test1: 10% [End of module 1, 2 and 3] (Learning outcome 1)</li> <li>▪ Test2: 10% [End of module 3, 4,5,6] (Learning outcome 2)</li> <li>▪ Practical (Lab exercise and viva): 30% (Practical is conducted at the end of the semester and includes evaluation of the lab exercises student carry out throughout the semester: (All the learning outcomes)</li> <li>▪ Test 3: 50% (Test 3 is conducted after completion of the course, at the end of the semester) (All the learning outcomes)</li> </ul>				
<b>Learning outcomes</b>				
Upon completion of the course, student will be able to:				
<ol style="list-style-type: none"> <li>1. Extract data from aerial photography</li> <li>2. Understand the process of reconstructing three-dimensional model for the real world</li> </ol>				
<b>Pedagogical approach</b>				
The course will be delivered through class lectures, lab exercise and tutorials.				
<b>Course Reading Materials (* = compulsory readings)</b>				
<b>Module 1 – 8 will be covered through following reading material.</b>				
<ol style="list-style-type: none"> <li>1. *Moffitt F.H. (1980) Photogrammetry, 3rd Ed, Harper &amp; Row, NY.</li> <li>2. Campbell J.B. (2002) Introduction to Remote Sensing, 3rd ed., The Guilford Press.</li> <li>3. *Paine D. P., Kiser J. D. (2012) Aerial Photography and Image Interpretation, John Wiley &amp; Sons, Inc.</li> <li>4. *Wolf P.R. (1983) Elements of Photogrammetry, McGraw-Hill, NY</li> <li>5. Joseph, G. and Jeganathan, C. (2018) Fundamentals of Remote Sensing. By. Universities Press (India) Private Limited, Hyderabad, India. ISBN 978-93-86235-46-6.</li> </ol>				
<b>Advanced reading.</b>				
<ol style="list-style-type: none"> <li>1. George J. (2005) Fundamentals of Remote Sensing Universities Press India</li> <li>2. Lillesand T.M., Kiefer R.W. and Chipman J.W. (2003) Remote Sensing and Image Interpretation, 5th ed., Wiley.</li> <li>3. Floyd F.S. (2007) Remote Sensing: Principles and Interpretation New York, WH Freeman and Company.</li> <li>4. Zorn H.C. (1980) Introductory Course in Photogrammetry, 6th Ed. ITC, Netherlands.</li> </ol>				
Journals				
<ol style="list-style-type: none"> <li>1. Asian Journal of Geoinformatics</li> <li>2. International Journal of Remote Sensing</li> <li>3. ISPRS Journal of Photogrammetry and Remote Sensing</li> </ol>				
<b>Additional information (if any)</b>				

**Magazines**

1. Coordinates
2. Geospatial today
3. GIM International
4. GIS World
5. GIS development
6. GPS World

**Student responsibilities**

Attendance, feedback, discipline, guest faculty etc.

**Course Reviewer:**

- Prof. J. K. Garg, Indraprastha University, Dwarka
- Dr. P.L.N. Raju, NESAC, Shillong
