

Course title: Renewable energy policy and regulations				
Course code: ENR 154		No. of credits: 3	L-T-P: 16-20-12	Learning hours: 48
Pre-requisite course code and title (if any): NA				
Department: Department of Energy and Environment				
Course coordinator: Prof. Atul Kumar		Course instructor(s): Dr. P C Maithani		
Contact details: atul.kumar@terisas.ac.in				
Course type: Core		Course offered in: Semester 2		
Course description				
<p>The course is meant to comprehensively impart knowledge on the overall policy and regulatory environment governing renewable energy development in the country. The students will also be sensitized to emergent trends competitive bidding in Solar and Wind based capacity addition.</p> <p>The course will cover national and state policies, regulatory and legislative frameworks on Renewable Energy. Some of these policies and guidelines emanate from an overarching Act such as the Electricity Act or another overarching policy such as the National Climate Change Policy. The policies, regulations and guidelines determine electricity off-take approaches, tariffs, control period and even technical requirements like maintenance of grid frequency in a certain band etc. It is also important to have an understanding of the institutional architecture that enables implementation of the policies and regulation as much as the policies in force.</p> <p>The course will present a policy and regulatory framework for renewable energy as it is practiced in India. However, similar frameworks either exist in other developing countries or certain elements can be adopted in other countries as well.</p>				
Course objectives				
<ul style="list-style-type: none"> ▪ To impart knowledge on the overall policy, regulatory and institutional framework on Renewable Energy ▪ To provide understanding of the main drivers that influence Renewable Energy policy formulation ▪ To provide insights on emergent policy trends with regard to procurement of renewable energy 				
Course contents				
Module	Topic	L	T	P
1	Introduction to policy parameters, regulatory bodies Introduction to overall policy environment on energy sector and the parameters that drive policy formulation such as – per capita electricity Consumption, % electrification, GDP, total installed capacity, generation mix and the overall power sector structure, Entities – Consumers and their tariffs, generator, DISCOM, Regulators- CERC & SERC, Statutory bodies, SLDC, RLDC, NLDC, CTU, STU, CEA Typical issues of Indian power sector – Cross Subsidization, Theft of electricity, Transmission losses etc.	4	2	0
2	Indian energy Policy An Introduction to Indian Energy Policy, Electricity Act, National Tariff Policy, National Action Plan on Climate Change , National RE Policy, National Solar Missions, Wind Power, Regulatory Commissions, Grid Code, Green Corridor, Solar Parks, Hybrid Parks, Repowering, Offshore, Scheduling and Forecasting, Electricity Trading, Open Access, RPO Distributed Generation Regional Grid in the South Asian Region. Electrification and off grid status/scenario in India Scenario evolving with competitive bidding	8	6	0
3	National grid, small grid and off grid policies Scope and challenges in implementing off grid solutions Policy & regulatory Framework for rural electrification Micro and Mini grids Relevant policies and frameworks in other countries Recent off grid programs started by Govt. of India for enhancing the rural electrification	4	2	0

	through off-grid solutions DDG scheme under Rajiv Gandhi Grameen Vidyutikaran Yojana (RGGVY) Remote Village Electrification Program Village Energy Security Programme (VESP) Off grid programme under JNNSM			
4	Seminar For this part of the course the students can take up a case study and analyse its Policy framework, outcomes, advantages /disadvantages. Few of the case studies which students can take up are given in the reference list	0	10	0
5	Simulation Lab/ Project In this, the students can familiarise themselves with methods of computing net tariff after accounting for Deviation settlement under forecasting and scheduling and working with open access charges in inter-state and intra-state Tariff computation as per CERC guidelines	0	0	12
		16	20	12
Evaluation criteria				
<ul style="list-style-type: none"> ▪ Assignment/Lab: 50% ▪ Minor test: 20% ▪ Major exam: 30% 				
Learning outcomes				
<ul style="list-style-type: none"> ▪ Enhanced understanding of renewable energy policy environment ▪ Sound understanding of the institutional frameworks w.r.t. Renewable Energy ▪ Sound understanding of policy frame work for grid connected and off grid renewable energy 				
Pedagogical approach				
A combination of class-room interactions, tutorials, assignments and projects.
