

<b>Course title:</b> Communication skills and technical writing				
<b>Course code:</b> NRE 101	<b>No. of credits:</b> 2	<b>L-T-P:</b> 16-12-0	<b>Learning hours:</b> 28	
<b>Pre-requisite course code and title (if any):</b>				
<b>Department:</b> Energy and Environment				
<b>Course coordinator(s):</b>		<b>Course instructor(s):</b> Dr Suneel Deambi		
<b>Contact details:</b> deambisuneel@gmail.com				
<b>Course type:</b> Core		<b>Course offered in:</b> Semester 1		
<p><b>Course description</b></p> <p>Students in the technology professions are proficient in their particular disciplines, but often unable to communicate effectively through reports or even scientific publications. Given that many students taking this course will not have a strong background in English, we propose to tackle this course in two ways.</p> <p>One, by exposing the student to the requirements of technical writing as opposed to other kinds of formal writing and two, by providing a large number of exercises aimed at improving basic grammar, which will be assessed.</p> <p>The student should be able to organize information for a report, a scientific paper and a proposal. He should be able to proofread his work, write concise emails and make technical presentations in PowerPoint. The use of graphs, tables and illustrations will also be taught.</p>				
<p><b>Course objectives</b></p> <ul style="list-style-type: none"> <li>▪ To introduce the students to the requirements of technical writing</li> <li>▪ To teach the students on how to collate and organize information for a a report, a scientific paper and a proposal.</li> </ul>				
<b>Course content</b>				
<b>Module</b>	<b>Topic</b>	<b>L</b>	<b>T</b>	<b>P</b>
	<p><b>Critical thinking, reading and writing</b></p> <ul style="list-style-type: none"> <li>▪ Why critical thinking is important in reading and writing?</li> <li>▪ Ideating and developing an argument</li> <li>▪ Understanding our audience and who we are writing for?</li> </ul>	2		
1.	<p><b>Academic writing: An interdisciplinary approach</b></p> <p><i>Understanding different styles in the science and social science space:</i></p> <ul style="list-style-type: none"> <li>▪ Thesis, dissertation (Understanding the difference in science and social science writing)</li> <li>▪ Publications, reports</li> <li>▪ Op eds, critiques</li> <li>▪ Blogs, journals</li> </ul> <p><i>On writing, well - positioning yourself as an author</i></p> <ul style="list-style-type: none"> <li>▪ Audience, purpose and strategy</li> <li>▪ Style, flow and formality</li> <li>▪ Developing a discussion, argument and analysis</li> <li>▪ Types of abstract and its development</li> <li>▪ Words and its usage - looking at various writing styles and guidelines</li> <li>▪ Use of infographics (tables, graphs, charts and visuals)</li> <li>▪ Paragraph development: unity, lead and ending</li> <li>▪ Reference styles</li> <li>▪ Proof reading &amp; editing</li> <li>▪ Understanding the peer review process</li> <li>▪ Presentation and form</li> </ul>	6	6
