Course type: Major		Course offered in: Semester 4	
<p>Course Description This undergraduate course on Sustainable Natural Resource Management (NRM) focuses on the principles and practices of managing natural resources sustainably. The course will emphasize the integration of ecological, economic, and social factors in resource management, moving beyond mere conservation to encompass broader NRM principles. It aims to equip students from diverse academic backgrounds with the necessary skills and knowledge to effectively manage natural resources while considering ecological integrity, economic viability, and social equity.</p>			
<p>Course objectives The course aims to build the following basic understanding among students:</p> <ul style="list-style-type: none"> • Understand the fundamental principles of sustainable natural resource management. • Analyze the interactions between human activities and natural resources. • Develop strategies for effective and sustainable management of various natural resources. • Evaluate the socio-economic implications of natural resource management decisions.
